

PROTECTIVE SECURITY RISK ASSESSMENTS

Protective Security Risk Assessments

Sound security practices are a core responsibility of any business. Security should form part of an organisation's culture, and integrated into its philosophy, policy and procedures.

Working closely with you and your staff and in line with your company's mission, scope and budget, our experienced security operators will carefully assess your organisation's security systems, policies, and protective posture against all identified direct and in-direct threats, hazards and risks to your mission and business operations.

Protective security is the organised system of defensive measures developed, implemented and sustained at all levels of operations with the aim of achieving and maintaining effective security.

MPS takes a holistic, client-specific and integrated approach to the facilitation of effective protective security risk, encompassing recognised pillars of security risk management, be it people, information, or physical based threats. All assessments are conducted using current and recognised standards .

On completion of the assessment, we will develop and furnish you with a detailed report on the current state of your security and recommend mitigation strategies, processes and systems for closing identified vulnerabilities and security gaps; reducing the risk against unauthorised access and compromise and ultimately providing piece of mind for your company and their clients.

Benefits

Security risk assessments allows organisations to:

- 🔒 Identify vulnerabilities in protective security specific to business operations.
- 🔒 Proactively, systematically and efficiently assess security risks.
- 🔒 Clearly communicate risks to decision-makers in a formal report.
- 🔒 Make balanced and informed security decisions based on evidence.
- 🔒 Select cost-effective, location specific treatment measures.
- 🔒 Create and maintain an appropriate protective security environment.
- 🔒 Assist key decision makers to answer the question:

‘What type and levels of security do we really need?’

About Us

Montane Protective Security (MPS) is a trusted and energetic professional services consultancy with demonstrated experience across all aspects of protective security; both in Australia and around the world.

Our highly skilled and security cleared staff have proven backgrounds in specialist security organisations and are adept at operating within discreet operational environments.

Through innovative and globally recognised service offerings tailored to meet the unique challenges faced by our clients we can equip businesses of all sizes with practical, scalable and cost-effective security solutions across all levels of operations.

MPS understands today's constantly evolving physical, human, and technical threats; and what it takes to protect you, your staff, clients and operations against malicious activity.

With substantial past performance, client satisfaction and a flexible and thorough approach to solutions development, Montane Protective Security and our likeminded partners will ensure that all client security requirements are effectively completed; on time and within budget.

Montane:

The vegetated, green belt prior to alpine and snow zones on mountains.
